

YOUR MISSION

In 15–20 minutes, make every listener understand that Gin Ashe Academy is **not another training provider**. It is a purpose-built, practitioner-led, ten-Stream skills institution for Africa — and it is **enrolling now**.

SECTION 0

The non-negotiables

Before anything else, lock these in. Say them right, every time.

ALWAYS SAY	NEVER SAY
Streams (not Schools or Faculties)	"10 Schools"
Enrolling now (for SDS & SFL)	"Live" / "Operating" / "Open"
Both Digital Systems and FinTech	"Our Digital Systems school"
September 2026 for the campus	"Campus now open"
SETA-aligned, in submission	"Accredited" (not yet)
Mobile learning units	"Solar-powered units"

The opening hook — first 60 seconds

The single most important moment of the interview. Don't open with "we offer courses." Open with the problem — then reveal the institution.

"Thank you for having me, Hulisani.

Let me start with the number that should keep every South African awake at night: **43.8%**. That's the share of our young people, between 15 and 34, who are unemployed today. Stats SA, Q4 last year.

But here's the part nobody talks about: **84% of large South African employers** say they can't find the skilled people they need to hire. So the jobs exist. The will exists. What's broken is the pipeline between them.

That's why we built Ginashe Academy. Not a bootcamp. Not a training centre. An institution — ten purpose-built Streams, two enrolling right now, the rest launching through 2029, with our Johannesburg flagship campus opening this September. And every single course is taught by practitioners — people who do the work, not just talk about it."

WHY THIS WORKS

Real, sourceable numbers — no inflated 32% or undocumented 12-million figure. It establishes institutional scope immediately, names the brand promise (practitioner-led), and hands Hulisani four things to ask about: the crisis, the employer gap, the ten-Stream model, and the September campus.

SECTION 2

The three pillars — what makes us different

When the host asks “what makes you different?” — these are the three you must land. Memorise the framing, then say them in your own voice.

PILLAR 1 WE ARE PRACTITIONER-LED

“Our instructors don’t come from lecture halls. They come from server rooms, banking floors, clinics, and construction sites. Our rule is simple: if you haven’t done it in the field this year, you can’t teach it in our classroom. That’s why our learners don’t need six months to adjust to the real world after graduating — they’re already in it.”

PILLAR 2 TEN STREAMS, ONE INSTITUTION

“Most providers offer a handful of short courses in one area. We built ten purpose-built Streams — each a focused vertical for a major sector. Digital Systems and Financial Literacy & FinTech are enrolling right now. Then progressively through 2029 we launch Health Sciences, Energy & Infrastructure, Agriculture & Food Security, Applied Trades & Engineering, Creative & Digital Media, Leadership & Entrepreneurship, Early Childhood & Education, and Environment & Climate Action. All under one institutional roof. There is nothing like it in South Africa.”

PILLAR 3 WE MEET THE LEARNER WHERE THEY ARE

“We operate four delivery channels. Online-first, so a learner in Polokwane takes the same course as one in Sandton. Our Johannesburg flagship campus opens this September. Employer partnerships — corporates and government sponsoring cohorts aligned to their hiring. And mobile learning units reaching rural and underserved communities. A learner in a rural municipality should not need to relocate to a city for a world-class skill. So we bring the institution to them.”

SECTION 3

Killer soundbites — memorise these

These are the lines that travel beyond the interview. Practise them until they feel natural — and pause after delivering one. Radio loves silence; it lets a line land.

IDENTITY	"We're not a bootcamp. We're not a training provider. We're an institution — and we built it from scratch for Africa."
TEACHING	"If you haven't done it in the field this year, you can't teach it in our classroom."
DIAGNOSIS	"South Africa doesn't have a jobs problem. We have a skills problem. The jobs are there — the pipeline is broken."
URGENCY	"South Africa doesn't need more graduates with theory. It needs people who can build, fix, code, heal, and lead — starting Day 1."
ACCESS	"A learner in a rural municipality should not need to relocate to a city for a world-class skill. So we bring the institution to them."
SCALE	"Ten Streams. Two enrolling, eight launching. One institution by 2029."
VISION	"If it's a critical skill that Africa needs, Ginashe Academy should be teaching it."
BRAND	"Our tagline is 'Build Something Real.' That's not a slogan — it's the brief we give every instructor and every learner."

Anticipated questions & powerful answers

Q · “Tell us about Ginashe Academy — what is it?”

Use the Opening Hook from Section 1. Problem Solution Scale September.

Q · “What courses do you offer?”

Don't list ten Streams — group them. “We organise our courses into ten Streams. The digital economy: our Digital Systems Stream — Cloud, AI & Machine Learning, Cybersecurity, Data & Analytics, Software & DevOps, Digital Transformation, Digital Business. Seven tracks, enrolling now. Finance and FinTech: Personal Finance, Banking & Credit, Investing, Payments, InsurTech, Open Finance — six tracks, also enrolling. Essential services from 2027: Health Sciences, Energy & Infrastructure, Agriculture. And from 2028: Applied Trades, Creative & Media, Leadership & Entrepreneurship, Early Childhood Education, then Environment & Climate in 2029.”

Q · “Who is this for?”

“It's for the matric graduate who was told there's nothing out there. The 28-year-old who's been job-hunting for three years. The corporate that needs a pipeline of skilled people, not paperwork. And the mother in a rural town who wants to retrain but can't relocate. We built Ginashe for all of them.”

Q · “How is this different from a TVET college or a university?”

“Three things. One — our instructors are practitioners, not academics. Two — our curriculum is co-designed with the employers who hire our graduates, so we teach what the market needs now, not five years ago. Three — we removed the access barriers: online-first, mobile units, flexible payment, employer-sponsored cohorts. The institution comes to the learner.”

Q · “Is Ginashe Academy accredited?”

Be honest — this is a credibility test. “We're aligning to nine SETAs across our Streams. Submissions are active right now — MICT SETA for Digital Systems, FASSET and BANKSETA for FinTech — with provisional accreditation targeted for Q4 this year. Industry partnerships are already in place with AWS, Microsoft, and CompTIA. And we built an Academic Council and an Independent External Moderation panel into our governance from day one. We are building credibility into the architecture — not bolting it on later.”

Q · “How do people afford it?”

“Multiple pathways: self-funded with instalment plans; B-BBEE employer-sponsored cohorts, where a corporate funds a group as part of their skills levy spend — with real graduates at the end, not just paperwork; SETA funding channels; and bursary programmes we're actively building. Money should never be the reason someone doesn't get skilled.”

Q · “Why now? Why does this need to exist in 2026?”

“Three reasons. Africa is the youngest continent — the IFC estimates 230 million jobs across Sub-Saharan Africa will need digital skills by 2030. Our existing institutions are at capacity. And B-BBEE has matured — corporates want skills spend that produces actual skilled people. We built Ginashe for that moment.”

Q · “What are your plans for the future?”

“Right now we're enrolling for both our Digital Systems and Financial Literacy & FinTech Streams, fully online. In September our Johannesburg campus opens. From 2027 we launch eight more Streams progressively, reaching the full ten-Stream institution by 2029. We're building infrastructure, not just a curriculum.”

HARD QUESTIONS — HAVE THESE READY

Two questions a sharp host may push on. Answer with grounded honesty, not defensiveness.

Q · “There are a lot of providers making big promises. Why should anyone believe yours?”

“Fair question — and the honest answer is, don’t take my word for it; look at the architecture. We’re a Pty Ltd with an independent Academic Council and External Moderation built in. Our SETA submissions are verifiable. Our Stream Leads are named, working practitioners. We’re not asking for trust on faith — we’re building it on documentation.”

Q · “Are you actually different, or just well-branded?”

“Branding is the easy part. The difference shows up in three places: who’s teaching, what they teach against, and where the learner can access it. Working professionals. Curriculum co-designed with hiring managers. No relocation required. That’s an operating model, not a logo. If we ever stop doing those three things, we’ll have failed.”

SECTION 5

Bridging phrases — when you need a moment

When a question is awkward, off-topic, or you need a beat to think:

- "That's a really important question. Let me put it in context..."
- "What's worth understanding here is..."
- "The honest answer is..." (use this — it builds trust)
- "Let me come back to that, because the bigger picture is..."
- "Hulisani, here's what I think your listeners really need to hear about that..."

SECTION 6

Verified stats to drop

Use these only where they fit. Don't recite them like a list — speak them like you've known them for years.

STAT	SOURCE	USE WHEN
43.8% youth unemployment	StatsSA QLFS Q4 2025	Diagnosing the crisis
84% employers can't fill roles	Xpatweb Survey 2025	Pipeline is broken
230M digital jobs by 2030 (SSA)	IFC / World Bank	Scale of opportunity
R1.6T skills-gap potential lost	W&RSETA	Cost of inaction
50,000+ renewable energy jobs by 2030	SA JET-IP	Why Energy Stream matters
~1:1,500 doctor-to-people, public sector	Dept. of Health	Why Health Stream matters

DROP THE UNVERIFIED ONES

Do not quote: 32% unemployment, 12 million unemployed, 20,000 cloud jobs, 30,000 artisan shortage, 70% can't budget. If pressed, say "industry estimates suggest..." rather than citing a number you can't source.

The close — last 60 seconds

End strong. Give listeners exactly what to do next. Repeat the website and the WhatsApp number — slowly, twice.

"If you're listening and you're ready to build a real skill — whether it's in tech, in finance, or one of our Streams launching from next year — head to www.ginashe.academy. That's ginashe dot academy. Applications for both our enrolling Streams are open right now.

If you're a business looking to invest your B-BBEE skills spend in something that actually produces skilled people, email partner@ginashe.academy.

And if you just want to chat to us directly, send us a WhatsApp on zero-six-eight, eight-five-two, six-one-five-five. That's zero-six-eight, eight-five-two, six-one-five-five.

Find us on LinkedIn, Facebook, and Instagram — just search Ginashe Academy.

The skills gap won't close itself. But together, we can close it — one learner at a time."

EMERGENCY 30-SECOND CLOSE

If you get cut off early, this is the all-purpose landing:

"If you remember nothing else: applications are open at ginashe.academy. WhatsApp us on [068 852 6155](tel:0688526155). We are building Africa's practitioner-led skills institution — and we are enrolling right now. Build something real with us."

SECTION 8

Interview do's and don'ts

DO

Use "Streams" — every time. Not schools, not faculties.

Say "entrolling now" for both SDS and SFL. Both.

Tell stories, not just facts. "I think of a learner who..."

Pause after key lines. To you it's forever; to the listener it's emphasis.

Say the URL and number twice each. Listeners are driving.

Thank Hulisani by name at least twice.

Use "we" language. It signals an institution.

Sound measured. You're a Managing Director, not a salesman.

Smile. It comes through your voice.

DON'T

Don't say "schools." Say Streams.

Don't claim accreditation we don't have. "In submission."

Don't list all ten Streams in one breath — group them.

Don't quote graduate salaries. We don't publish those.

Don't compare yourself down to other providers. New category.

Don't say "solar-powered units." "Mobile learning units."

Don't rush. 15 minutes? Use 14:30.

Don't forget to breathe — especially before hard questions.

SECTION 9

Pre-interview checklist

THE NIGHT BEFORE

Read this document twice

Practise the Opening Hook out loud — 3x

Practise the Close out loud — 3x (number slowly)

Set two alarms for 10:30

ONE HOUR BEFORE

Quiet room — door closed

Signal / internet tested + backup

Glass of water within reach

This document printed or on 2nd screen

ginashe.academy open on your phone

Three deep breaths — and smile

THE LINE TO REMEMBER

"South Africa doesn't need more certificates on walls. It needs more hands that can build, code, heal, and lead. That's what Ginashe Academy delivers."

— George Kapendeka, Managing Director
